AUTHOR

Beker, HJ Security in an electronic fund transfer system 185
Bentham, R Security in banking 17
Berman, A Virtual password systems 228
Bing, J Personal data systems — a comparative perspective on a basic concept in privacy legislation 28
Blekeli, RD Patient information flow from doctors 37
Cousins, B Privacy and confidentiality 26
Cousins, B Privacy and confidentiality: Part 2 162
Coward, R Development of databases in a European context 34
Davies, DW and Bell, DA Protection of data cryptography 106
Davies, DW, Price, WL and Parkin, GI Evaluation of public-key cryptosystems 138
Foyen, A Implementation of the Norwegian Personal Data Registers Act 190
Furuta, R Electronic funds transfer: a review of current technology and societal issues 231
Gordon, J Use of intractable problems in cryptography 178
Greguras, FM Information systems and privacy issues in the USA 90
Greguras, FM US EFT Privacy Act: the legislative charge begins 50
Hills, PM Computer systems at a UK medical centre 207
Johnsen, K System implications of privacy legislation 60
Kelman, A The computer's word as evidence 244
Koch, H Encryption in the network environment 224
Kraemer, KL, Dutton, WH and Northrop, A Management control, the automated budget and information handling 7
Merrill, DC Legal management information system 194
Nielsen, N and Ruder, B Computer system integrity vulnerability 21
O'Connell, S Communications networks philosophies 220
Porter, N What should you do about computer security 75
Pritchard, J Computer security and unionization 69
Robinson, P Transborder dataflow — a Canadian perspective 55
Sizer, D Computer fraud 241
Steinmuller, W Rationalization and modellification: two complementary implications of information technologies 155
Turn, R Technical implications of privacy-protection requirements 2
Wilhelmsen, J Public access to precedent files 80
Willsher, S Management guidelines for computer security implementation 102
Wong, K Implications of computer security and privacy 98

TITLE

Communications networks philosophies **O'Connell, S** 220
Computer fraud **Sizer, D** 251
Computer security and unionization **Pritchard, J** 69
Computer system at a UK medical centre **Hills, PM** 207
Computer system integrity vulnerability **Nielsen, N and Ruder, B** 21
Development of databases in a European context **Coward, R** 34
Electronic funds transfer: a review of current technology and societal issues **Furuta, R** 231
Encryption in the network environment **Koch, H** 224
Evaluation of public-key cryptosystems **Price, WL and Parkin, GI** 138
Implementation of the Norwegian Personal Data Registers Act **Foyen, A** 190
Implications of computer security and privacy **Wong, K** 98
Information systems and privacy issues in the USA **Greguras, FM** 90
Legal management information system **Merrill, DC** 194
Management control, the automated budget and information handling **Kraemer, KL, Dutton, WH and Northrop, A** 7
Management guidelines for computer security implementation **Willsher, S** 102
Patient information flow from doctors **Blekeli, RD** 37
Personal data systems — a comparative perspective on a basic concept in privacy legislation **Bing, J** 28
Privacy and confidentiality **Cousins, B** 26
Privacy and confidentiality: Part 2 **Cousins, B** 162
Protection of data cryptography **Davies, DW and Bell, DA** 106
Public access to precedent files **Wilhelmsen, J** 80
Rationalization and modellification: two complementary implications of information technologies **Steinmuller, W** 155
Security in an electronic fund transfer system **Beker, HJ** 185
Security in banking **Bentham, R** 17
System implications of privacy legislation **Johnsen, K** 60
Technical implications of privacy-protection requirements **Turn, R** 2
The computer's word as evidence **Kelman, A** 244
Transborder dataflow — a Canadian perspective **Robinson, P** 55
US EFT Privacy Act: the legislative charge begins **Greguras, FM** 50
Use of intractable problems in cryptography **Gordon, J** 178
Virtual password systems **Berman, A** 228
What should you do about computer security **Porter, N** 75

SUBJECT

AUDIT AND BUSINESS

Development of databases in a European context **Coward, R** 34
Electronic funds transfer: a review of current technology and societal issues **Furuta, R** 231
Management control, the automated budget and information handling **Kraemer, KL, Dutton, WH and Northrop, A** 7
Security in an electronic fund transfer system **Beker, HJ** 185
Security in banking **Bentham, R** 17

CALENDAR 48, 136, 176, 216, 256

COMPUTER MISUSE

Benefits of computer fraud **Moffett, J** 170
Computer fraud **Sizer, D** 241
Confidential computer reports **Moffett, J** 87
Distributed audit trails **Moffett, J** 42
Frayed edges of data security **Moffett, J** 131
Human authorization of computer actions **Moffett, J** 253
Risk analysis of computer fraud **Moffett, J** 212

CONFERENCES

UK Parliamentary Computer Forum 127

ENCRYPTION

Encryption in the network environment **Koch, H** 224
Evaluation of public-key cryptosystems **Price, WL and Parkin, GI** 138
Protection of data cryptography **Davies, DW and Bell, DA** 106
Use of intractable problems in cryptography **Gordon, J** 178

INTERNATIONAL REVIEW

USA: House hearings on transborder dataflows: a reflection **Crawford, MH** 165
European Parliament debate 84

LEGISLATION

Implementation of the Norwegian Personal Data Registers Act **Foyen, A** 190
Legal management information system **Merrill, DC** 194
Legislation for information privacy 248
Personal data systems — a comparative perspective on a basic concept in privacy legislation **Bing, J** 28
Public access to precedent files **Wilhelmsen, J** 80
System implications of privacy legislation **Johnsen, K** 60
Technical implications of privacy-protection requirements **Turn, R** 2
The computer's word as evidence **Kelman, A** 244

MARKETPLACE

Concern expressed by computer users 214
Data encryption system for micro-computers 214
Signature verification 215
Security control system 215
Speech scrambling 215
Support for action on data protection 172
Banks accused of conspiracy over point-of-sale 172
Fire protection 172
Citizens rights report 134
Software for computer security 134
Criminal information 135
Security systems 135
Data security 135
Encryption using the DES algorithm 44
Encryption order 44
Security equipment demonstrated 45
Debugging the executive 45

PUBLICATIONS

Computer networks and data-protection law **Greguras, FM** 46

QUESTIONNAIRE

Use of encryption 173

SECURITY

Communications networks philosophies **O'Connell, S** 220
Computer system integrity vulnerability **Nielsen, N and Ruder, B** 21
Implications of computer security and privacy **Wong, K** 98
Management guidelines for computer security implementation **Willsher, S** 102
Virtual password systems **Berman, A** 228
What should you do about computer security **Porter, N** 75

SOCIAL ISSUES

Computer security and unionization **Pritchard, J** 69
Computer system at a UK medical centre **Hills, PM** 207
Information systems and privacy issues in the USA **Greguras, FM** 90
Patient information flow from doctors **Blekeli, RD** 37
Privacy and confidentiality **Cousins, B** 26
Privacy and confidentiality: Part 2 **Cousins, B** 162
Rationalization and modellification: two complementary implications of information technologies **Steinmuller, W** 155

TRANSBORDER DATAFLOW

Transborder dataflow — a Canadian perspective **Robinson, P** 55
US EFT Privacy Act: the legislative charge begins **Greguras, FM** 50
